NovAtel® Announces Version 8.80 for Waypoint® Post-Processing Products

March 6, 2019

NovAtel is pleased to announce the latest update, version 8.80, to our Waypoint post-processing portfolio, which consists of Inertial Explorer®, GrafNav/GrafNet® and Inertial Explorer Xpress. All Waypoint customers with an active subscription that are within their support period qualify for this upgrade at no additional charge.

Waypoint version 8.80 provides the following key upgrades:

- Optional access to TerraStar-NRT that provides high-rate precise satellite orbit and clock corrections for GPS, Galileo, BeiDou, GLONASS and QZSS system within minutes, which negates long data waiting periods and allows for quicker work flows
- The ability to choose between L1/L2 or L1/L5 frequencies in differential solutions
- Increased accuracy for pedestrian and vehicle applications by applying pedestrian and ground vehicle constraints
- 14% faster processing with 64-bit support

To request an update on an active subscription or inquire about your license status, please [click here](#).

You can request a free 7-day demo license for TerraStar-NRT through our website at novatel.com/nrt-trial
